PROMISE GOLD REFINERY FZE

REFINER'S COMPLIANCE REPORT- On REVIEWER'S FOLLOW-UP REVIEW

Promise Gold Refinery FZE affirms its ongoing commitment to responsible gold sourcing in full compliance with the UAE Ministry of Economy's Due Diligence Regulations for Responsible Sourcing of Gold, issued under Ministerial Decree No. (68) of 2024. Our action on corrective action plan in line with the assurance report issued for the year 2024.

PROMISE GOLD REFINERY FZE- EVALUATION OF COMPLIANCE

SUMMARY OF ACTIVITIES UNDERTAKEN TO DEMONSTRATE COMPLIANCE	
STEP 1: ESTABLISHING AN EFFECTIVE GOVERNANCE FRAMEWORK	
COMPLIANCE STATEMENT	**COMPLIANT WITH LOW-RISK DEVIATIONS**
DEMONSTRATION OF COMPLIANCE	

Promise Gold Refinery FZE, in line with its corrective action plan, has established and implemented a comprehensive suite of policies supporting its compliance and responsible sourcing framework, including:

- AML/CFT & Counter-Proliferation Financing Policy
- Responsible Sourcing & Supply Chain Due Diligence Policy
- Onboarding and Ongoing Risk Assessment Policy
- Anti-Bribery and Corruption Policy
- Grievance and Whistleblowing Policy
- Human Rights – Child and Bonded Labour Policy
- Environmental Health and Safety Policy
- Enterprise-Wide Risk Assessment Policy
- ESG Policy

Promise Gold Refinery FZE has also established a clearly defined governance structure to ensure effective implementation of responsible sourcing and supply chain due diligence across all organizational levels. Roles and responsibilities are formally documented within internal policies, standard operating procedures, and job descriptions, and are periodically reviewed under the oversight of the Compliance function.

Promise Gold Refinery FZE has appointed a dedicated Compliance Officer, Mr. James Mohan Chandran, supported by a qualified compliance team and operating with full independence, authority, and direct access to Senior Management, employees, and relevant counterparties. Mr. James Mohan Chandran brings over four years of specialized experience in regulatory compliance, bullion trading, and precious metals supply chain oversight, and has successfully completed the International Compliance Association (ICA) Certification in AML/CFT, further strengthening his professional competency and alignment with international compliance standards to carry out his responsibilities.

Promise Gold Refinery FZE has established and implemented a structured and risk-based Supply Chain Due Diligence Training Program as a key component of its AML/CFT and responsible sourcing framework. To further strengthen its responsible sourcing framework, Promise Gold Refinery FZE has engaged an independent third party, IEG, to conduct supply chain audits and provide

specialized training to the internal team. Comprehensive training records, attendance logs, assessment results, and feedback documentation are securely maintained to ensure audit readiness, traceability, and regulatory transparency.

Promise Gold Refinery FZE strictly enforces a policy of conducting business only with duly licensed and legally authorized entities, forming a critical control within its compliance and responsible sourcing framework. Promise Gold Refinery FZE confirms that all counterparties within its supply chain operate independently and in their own capacity, without the involvement of intermediaries, brokers, or agents acting on their behalf.

Promise Gold Refinery FZE does not currently engage in the sourcing of primary mined gold, including Artisanal and Small-Scale Mining (ASM) or Large-Scale Mining (LSM) sources. The Company's operations are limited to secondary/recycled gold and refined gold, thereby significantly reducing exposure to upstream risks such as conflict financing, human rights violations, and illicit mining activities.

- Commercial documentation
- Supplier declarations confirming conflict-free origin
- Verified weight and assay results

Independent testing is conducted where necessary. This ensures complete traceability, transparency, and compliance with responsible sourcing requirements. Promise Gold Refinery FZE enforces strict payment control measures aligned with UAE AML/CFT regulations. Bank transfers are the preferred payment method and are conducted exclusively through verified corporate accounts. e. These measures ensure financial transparency, traceability, and effective risk mitigation.

Promise Gold Refinery FZE operates under a UAE-only sourcing model, dealing exclusively in secondary/recycled gold and refined gold, and does not engage in sourcing from Conflict-Affected and High-Risk Areas (CAHRAs). To reinforce responsible sourcing practices, all suppliers are required to formally confirm the origin and nature of gold supplied, including submission of Statements of Conformance and Gold Declarations confirming recycled and conflict-free origin.

STEP 2: IDENTIFICATION AND ASSESSMENT OF THE SUPPLY CHAIN RISK

COMPLIANCE STATEMENT	NOT COMPLIANT WITH MEDIUM RISK DEVIATIONS

DEMONSTRATION OF COMPLIANCE

Promise Gold Refinery FZE has established a structured and risk-based On-Site Visit and Supply Chain Verification Framework as part of its broader due diligence program, aligned with the UAE Ministry of Economy's Due Diligence Regulations for Responsible Sourcing of Gold (MD 68/2024), UAE AML/CFT legislation, Emirates Bullion Committee (EBC) Rules, and the OECD Due Diligence Guidance. Promise Gold Refinery FZE conducts on-site visits as a core control mechanism to ensure the authenticity, transparency, and compliance of its suppliers. These visits are carried out independently by the Compliance Officer, often in coordination with the Sales or Operations teams, ensuring both regulatory and commercial perspectives are considered.

Scope and Approach to On-Site Visits
On-site visits are conducted:

- At the onboarding stage for new suppliers, particularly where medium or higher risk is identified
- Periodically for existing suppliers, based on risk classification and monitoring triggers
- On an ad-hoc basis, where red flags or anomalies are identified

Step 3: Management of the Supply Chain Risk

COMPLIANCE STATEMENT	NOT COMPLIANT WITH MEDIUM RISK DEVIATION

DEMONSTRATION OF COMPLIANCE

Promise Gold Refinery FZE has established a comprehensive, structured, and risk-based Supply Chain Risk Management Strategy to address and mitigate risks identified under Step 2 of the UAE Ministry of Economy's Due Diligence Regulations for Responsible Sourcing of Gold (MD 68/2024). This strategy is embedded within the Company's broader Supply Chain Policy and Risk Appetite Framework, ensuring that all identified risks are evaluated, treated, and monitored in a consistent, proportionate, and auditable manner. The Company adopts a clearly defined risk appetite approach, whereby risks are assessed based on their severity, likelihood, and potential impact across AML/CFT, sanctions, reputational, operational, and ethical dimensions. Based on this assessment, the Company applies one of three primary risk treatment outcomes:

- Establish or Continue Relationship with Mitigation Controls,
- Suspend Relationship, or
- Terminate Relationship, supported by strong governance oversight from Senior Management and the Compliance function.

The Company's risk management strategy is supported by a strong and continuous monitoring and governance framework, including:

- Real-time transaction monitoring and red flag detection
- Periodic re-KYC and risk reassessment based on supplier risk classification
- Continuous sanctions, PEP, and adverse media screening
- Internal compliance reviews and independent external audit processes
- Active oversight by Senior Management and the Compliance function

This proactive and preventative approach ensures that risks are identified early and managed effectively, minimizing the likelihood of escalation to suspension or termination. The Risk Control Plan is applied in cases where the Company adopts an "Establish/Continue" approach with mitigation measures, and is designed to ensure that risks are actively managed, continuously monitored, and escalated where necessary, while maintaining compliance with UAE regulatory requirements and international best practices.

Promise Gold Refinery FZE operates a robust and dynamic Continuous Monitoring Framework to ensure ongoing oversight of supply chain risks in line with UAE regulatory requirements and international best practices. The Company conducts continuous screening of counterparties and transactions through tools such as Cygnus Scan, covering sanctions, PEPs, and adverse media, alongside monitoring transaction patterns, payment behaviour, and shipment consistency. Periodic validation of supplier KYC, ownership structures, and operational profiles ensures that any changes in risk exposure are promptly identified. The framework incorporates clearly defined trigger-based reassessment mechanisms, whereby changes such as ownership updates, adverse media hits, transactional anomalies, geographic exposure shifts, or regulatory developments prompt immediate review. Depending on the nature of the trigger, the Company undertakes targeted actions, including updated KYC, Enhanced Due Diligence (EDD), supplier engagement, and escalation to Compliance and Senior Management.

Promise Gold Refinery FZE has established a structured and well-governed risk reporting and escalation framework to ensure that all identified supply chain risks and corresponding Risk Control Plans are periodically reported to Senior Management and, where applicable, the Board (or equivalent oversight authority), in line with the UAE Ministry of Economy's Due Diligence Regulations for Responsible Sourcing of Gold (MD 68/2024). These reports are formally reviewed, approved, and signed off by Senior Management, ensuring that leadership maintains active oversight of risk management activities and compliance performance.

Senior Management oversight ensures that:

- Risk Control Plans are appropriately implemented and monitored
- Corrective actions are tracked and completed within defined timelines

STEP 4: INDEPENDENT THIRD-PARTY AUDIT OF DUE DILIGENCE MEASURES	
COMPLIANCE STATEMENT	**COMPLIANT WITH LOW-RISK DEVIATIONS**
DEMONSTRATION OF COMPLIANCE	
The Company has engaged **AVS Lewis and Pecker Auditing & Business Advisors** to conduct its 90 DAYS Follow- Up Review, ensuring full adherence to regulatory requirements relating to independence, competence, and objectivity. The appointed auditor has no conflicts of interest and has not provided any ancillary advisory or consultancy services that could impair audit independence. Promise Gold Refinery FZE is committed to timely implementation of all audit recommendations, integrating findings into its continuous improvement framework, policy enhancements, and control strengthening initiatives. This independent audit engagement further reinforces the Company's commitment to transparency, accountability, and best-in-class responsible sourcing practices, supporting its position as a compliant and trusted participant within the UAE precious metals sector.	

STEP 5: ANNUAL REPORTING ON DUE DILIGENCE MEASURES (90 DAYS FOLLOW UP REVIEW)	
COMPLIANCE STATEMENT	**COMPLIANT WITH LOW-RISK DEVIATIONS**
DEMONSTRATION OF COMPLIANCE	
A systematic risk assessment framework is in place to identify, categorize, and document red flags using both internal and external data sources, enabling early detection and informed risk evaluation. I reinforce accountability and transparency, the refinery has engaged AVS Lewis and Pecker Auditing & Business Advisors, a Ministry-approved independent auditor, to conduct its annual responsible sourcing audit for the year 2025, with the Independent Assurance Report to be publicly disclosed for our previous reviews and made available to competent authorities.	

TABLE 2. MANAGEMENT CONCLUSION

PROMISE GOLD REFINERY FZE has completed its internal compliance self-assessment across the five core regulatory components outlined by the UAE Ministry of Economy. The refinery confidently affirms it's overall risk status as "**NON-COMPLIANT WITH MEDIUM RISK DEVIATIONS**", reflecting its robust governance, effective due diligence controls, and alignment with international and national responsible sourcing expectations.

REGULATORY RULE	SELF-RATING

INDEPENDENT REASONABLE ASSURANCE REPORT TO PROMISE GOLD REFINERY FZE - ISAE 3000 ENGAGEMENTS

AVS LEWIS AND PECKER AUDITING (The Reviewer) was engaged by the Management of PROMISE GOLD REFINERY FZE - (The Regulated Entity or The Refiner) to provide a follow-up review report on its corrective action plan proposed in the Reviewer's reasonable assurance report for the period from 01st January 2024 to 31st December 2024. Recommended action plan has been reviewed for the period of August 2025 to February 2026. The scope of the document is derived based on evaluating the Refiner's Compliance Report (The Report) prepared for the period August 2025 to February 2026.

MANAGEMENT RESPONSIBILITIES

The Management of the company is responsible for the preparation and presentation of the Refiner's Compliance Report in accordance with the Emirates Bullion Market Committee (EBC) Rules for Risk Based Due Diligence in the Gold Supply Chain (EBC Rules for RBDG/Version 1 of August 2022) and its Annex 2 EBC Review Protocol. This Responsibility includes establishing appropriate risk management and internal controls from which the reported information is derived. The criteria identified by the management as relevant for demonstrating compliance with the guidance are the activities described within the refiner's compliance report.

AUDITORS RESPONSIBILITIES

Our responsibility is to carry out a mandatory 90 days follow-up review on the reasonable assurance carried out for the year 2024 in order to express an opinion as to whether the Refiner's Compliance Report, in all material respects, describes fairly the activities undertaken during the year to demonstrate compliance and with management's overall conclusion contained therein is in accordance with the requirements of the guidance. We conducted our engagement in accordance with the International Standards on Assurance Engagements (ISAE) 3000. Assurance Engagements other than Audits or reviews of the Historical Financial information issued by the International Auditing and Assurance Standards Board and EBC rules for Risk Based Due Diligence in the Gold Supply Chain (EBC Rules for RBDG/Version 1 of August 2022) and its Annex 2 EBC Review Protocol.

Our work has been undertaken so that we report to PROMISE GOLD REFINERY FZE on those matters that we have agreed to state to them in this report. Our report is not performed/prepared in the manner in order to meet the needs of any particular customer rather evaluated based on the actual performance of the refiner on their adherence to the EBC rules for Risk Based Due Diligence in the Gold Supply Chain (EBC Rules for RBDG/Version 1 of August 2022).

SCOPE AND ASSURANCE PROCEDURES UNDERTAKEN

As a part of the review, we meticulously planned and implemented an approach to gather essential evidence, information and explanations pertinent to our defined scope. The process encompassed several key steps, which includes the following:

- Development of a detailed Review Plan, scope of audit, criteria, principles and activities.

HEAD OFFICE: OFFICE#613 AL KHALEEJ CENTER|BUR DUBAI|DUBAI – U.A.E
SHARJAH OFFICE: HAMRIYAH FREEZONE| SHARJAH – UNITED ARAB EMIRATES
P O Box – 236041 | Tel: +971 4 339 0116 | Fax: +971 4 339 0119
Email: info@lewisandpecker.com | Website: www.lewisandpecker.com

- Conduct meeting with the senior management to discuss on the review plan, protocols followed for the review, setting the timeline and emphasize the confidentiality essential to process.
- Documents related to the Refiner and its operations ie., policies, procedures, standards, licenses and permits, specifications, contracts, policy related to supply chain, policy demonstrating management systems with security protocols, due diligence process and risk management practices. The process also included collection of client details transaction records and origin data.
- Collection of documents relating to corrective action plan where collected.
- Site visits to execute the onsite review phase, engage in deep analysis to collect evidence supporting the review objectives.
- Collection of supporting documents related to gold supplier's Counterparty due diligence and transaction documents.

INHERENT / SIGNIFICANT LIMITATIONS / AREAS NOT COVERED

While this Follow-up review Report provides a structured and comprehensive assessment of the Regulated Entity's compliance with the Ministry of Economy's Due Diligence Regulations, certain inherent limitations in the review process must be acknowledged:

- **Subjectivity in Compliance Assessment:** Evaluating compliance often involves qualitative judgments and the interpretation of regulatory requirements. Despite the use of defined criteria and structured assessment methods, the review may be influenced by subjective perspectives or differing interpretations of the regulations.
- **Limited Scope of Document Verification:** The review included an examination of selected documents and management assertions through interviews and sample testing. However, the authenticity of these documents was not independently verified with the relevant government bodies or third-party entities.
- **Reliance on Information Provided by the Entity:** The review is based on information and data provided by the Regulated Entity. While efforts were made to assess the reliability of this information, it was not independently validated. Therefore, our conclusions are dependent on the completeness and accuracy of the information received.
- **External Factors Beyond Review Scope:** The review cannot anticipate or address external developments occurring after the review period, such as changes in applicable laws, regulatory focus, or the entity's operational model, which may affect ongoing compliance.
- **Timeliness of Findings:** The conclusions in this report reflect the status of the Regulated Entity as of the review period. Given the dynamic nature of business operations and financial transactions, compliance status may change after the review period and prior to subsequent reviews.
- **Risk of Human Error and Undetected Fraud:** As with any assurance engagement, there is an inherent risk that errors, omissions, or fraudulent activities may not be identified, even when procedures are carefully designed and executed. This review does not provide absolute assurance against such risks.

INDEPENDENCE AND COMPETENCY STATEMENT

In performing our engagement, we have adhered to the relevant provisions of the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants (IESBA), which is based on the fundamental principles of integrity, objectivity, professional competence and due care, confidentiality, and professional behaviour. We also confirm that we meet the eligibility criteria for assurance providers as outlined in the Audit Guidance for conducting this assurance engagement.

SUMMARISED EVALUATED CONCLUSION:

The Regulated Entity's compliance team has taken steps to strengthen controls over supply chain due diligence, and the reviewer's guidance and feedback outlined in the recommended corrective action plan have shown measurable progress compared with the 2024 review period. However, customer onboarding procedures, risk identification processes, and the execution of due diligence measures—including supply chain due diligence—will continue to be monitored during the 2025 review period.

ASSESSMENT CONCLUSION
