1. PURPOSE

Promise Gold Refinery FZE is committed to maintaining the highest standards of environmental protection, occupational health, and workplace safety across all aspects of its gold refining and precious metals processing operations. As a refinery operating within the United Arab Emirates and aligning its management systems with the requirements of ISO 45001:2018 Occupational Health and Safety Management Systems, the Company is dedicated to providing a safe and healthy working environment for all employees, contractors, visitors, and other stakeholders who may be affected by its activities.

The purpose of this Environmental, Health and Safety (EHS) Policy is to establish a clear framework through which Promise Gold Refinery FZE manages environmental and occupational health and safety risks associated with refinery operations. This policy reflects the Company's commitment to preventing work-related injuries and illnesses, protecting the environment from operational impacts, and ensuring full compliance with applicable UAE environmental, occupational health, and industrial safety regulations, as well as internationally recognized safety standards.

As a gold refinery operating in a specialized industrial environment, Promise Gold Refinery FZE recognizes that refining processes involve the use of hazardous chemicals, high-temperature metallurgical processes, and specialized industrial equipment. Accordingly, the Company adopts a proactive and systematic approach to Environmental, Health and Safety management, ensuring that potential hazards are identified, risks are assessed, and appropriate control measures are implemented to protect personnel, facilities, and the surrounding environment.

Promise Gold Refinery FZE implements robust risk management procedures, operational controls, monitoring mechanisms, and continuous improvement initiatives across all refinery activities. These measures are designed to ensure that environmental and occupational health and safety considerations are integrated into the planning, execution, and oversight of all operational processes.

Promise Gold Refinery FZE is committed to

- Preventing workplace injuries, occupational illnesses, and safety incidents through systematic hazard identification, risk assessment, and the implementation of effective preventive and protective measures.
- Protecting the environment by minimizing emissions, controlling waste generation, and implementing responsible environmental management practices throughout refinery operations.
- Ensuring the safe storage, handling, transportation, and disposal of hazardous materials and chemicals used in refining processes in accordance with applicable environmental and safety regulations.
- Maintaining full compliance with all applicable UAE environmental, occupational health, and industrial safety regulations, including relevant requirements issued by municipal authorities, environmental agencies, and civil defence authorities.
- Promoting a strong culture of safety, accountability, and environmental responsibility throughout the organization by ensuring that employees and contractors are properly trained, informed, and actively engaged in maintaining safe working conditions.

Through the effective implementation of this policy and alignment with the principles of ISO 45001:2018, Promise Gold Refinery FZE seeks to continually improve its Environmental, Health and Safety performance, strengthen risk management practices, and ensure that all refinery operations are conducted in a safe, responsible, and environmentally sustainable manner.

2. SCOPE

This Environmental, Health and Safety (EHS) Policy applies to all operational activities, facilities, processes, and personnel associated with the operations of Promise Gold Refinery FZE. The policy establishes the environmental, occupational health, and workplace safety standards that govern the Company's gold refining and precious metals processing activities and ensures that Environmental, Health and Safety considerations are integrated into all operational and management practices.

The scope of this policy extends to all refinery facilities and operational areas operated by Promise Gold Refinery FZE, including refining plants, processing units, chemical storage areas, precious metals storage facilities, laboratories, maintenance areas, and all supporting infrastructure located within the refinery premises. The policy also applies to any operational activities carried out off-site where such activities are performed on behalf of the Company or are directly associated with refinery operations.

This policy applies to all individuals who work at or on behalf of Promise Gold Refinery FZE. This includes all employees of the Company, whether permanent, temporary, or contractual, as well as contractors, subcontractors, consultants, and service providers performing work within the refinery premises or supporting refinery operations. All such personnel are required to comply with the Environmental, Health and Safety requirements established under this policy.

The policy further applies to all visitors, regulatory inspectors, and other authorized individuals entering refinery facilities. Visitors are required to comply with the Company's safety procedures, access controls, and operational guidelines designed to ensure a safe working environment and to minimize exposure to potential hazards associated with refinery operations.

In addition, the scope of this policy includes all logistics and transportation activities associated with refinery operations. This encompasses the transportation, loading, unloading, and handling of precious metals, raw materials, chemicals, equipment, and waste materials that are used in or generated by the refining process. Logistics providers, transport contractors, and other service providers engaged in such activities must comply with the environmental and safety standards established by Promise Gold Refinery FZE.

This policy also applies to all operational processes carried out within the refinery, including but not limited to the refining, smelting, and metallurgical processing of precious metals; the storage, handling, and use of chemicals and hazardous materials; and the management of industrial waste and emissions generated through refining activities. The policy further governs environmental protection measures, waste management procedures, emissions control systems, and other environmental monitoring activities designed to minimize the environmental impact of refinery operations.

Furthermore, the policy covers facility maintenance, engineering activities, equipment servicing, and all operational support functions required for the safe and efficient functioning of refinery operations. These activities must be carried out in accordance with the Environmental, Health and Safety standards established under this policy and in compliance with applicable UAE regulatory requirements.

Promise Gold Refinery FZE ensures that Environmental, Health and Safety principles are embedded throughout the Company's operational framework, thereby promoting a safe workplace, responsible environmental management, and compliance with applicable regulatory and international safety standards.

3. REGULATORY FRAMEWORK

Promise Gold Refinery FZE implements and maintains its Environmental, Health and Safety (EHS) management framework in full compliance with the applicable laws, regulations, and regulatory requirements of the United Arab Emirates, as well as internationally recognized environmental and occupational safety standards relevant to industrial and precious metals refining operations.

The Company implements and maintains a structured Environmental, Health and Safety (EHS) management framework to ensure that all refinery activities are conducted responsibly, safely, and in accordance with the regulatory requirements applicable to industrial facilities operating within SAIF Zone and the UAE.

Promise Gold Refinery FZE ensures compliance with the relevant UAE federal legislation governing environmental protection and occupational health and safety, including Federal Law No. 24 of 1999 for the Protection and Development of the Environment, which establishes the national framework for environmental protection, pollution prevention, and environmental risk management. The Company also adheres to the occupational health and safety provisions under UAE Federal Law No. 8 of 1980 (UAE Labour Law) and its subsequent amendments, which establish requirements relating to workplace safety, employee protection, and occupational health standards.

Promise Gold Refinery FZE complies with applicable local environmental and industrial safety regulations issued by the Sharjah Environment and Protected Areas Authority (EPAA) and the regulatory requirements applicable to industrial operations within Sharjah Airport International Free Zone (SAIF Zone). The Company also adheres to all applicable UAE Civil Défense regulations, including those governing fire safety systems, emergency preparedness, and industrial facility safety requirements.

Furthermore, the Company ensures compliance with applicable municipal and regulatory requirements relating to hazardous materials storage, chemical handling, waste management, and environmental protection, as issued by relevant authorities in the Emirate of Sharjah and UAE.

In order to promote internationally recognized best practices in environmental and occupational safety management, Promise Gold Refinery FZE aligns its Environmental, Health and Safety framework with globally recognized standards including ISO 14001 for Environmental Management Systems and ISO 45001 for Occupational Health and Safety Management Systems. The Company also takes into consideration relevant guidance provided by the International Finance Corporation (IFC) Environmental, Health and Safety Guidelines and the International Labour Organization (ILO) Occupational Safety and Health standards, which promote safe working environments, responsible industrial operations, and protection of workers' rights.

Promise Gold Refinery FZE ensures that its Environmental, Health and Safety management practices support safe refinery operations, protect the health and safety of employees and stakeholders, and minimize environmental impacts associated with precious metals refining activities within UAE.

4. OUR COMMITMENTS

Promise Gold Refinery FZE is committed to maintaining a safe, healthy, and environmentally responsible refinery operation and to ensuring that all activities are conducted in compliance with applicable legal, regulatory, and operational standards within the United Arab Emirates. As a gold refinery operating in SAIF Zone, Sharjah, the Company recognizes the inherent environmental, occupational health, and industrial safety risks associated with precious metals refining, chemical handling, smelting, storage, and related support activities. Accordingly, Promise Gold Refinery FZE adopts the following commitments as part of its Environmental, Health and Safety framework.

a. Legal and Regulatory Compliance

Promise Gold Refinery FZE shall ensure strict compliance with all applicable UAE federal, Emirate of Sharjah, SAIF Zone, municipal, environmental, and civil defence requirements relevant to Environmental, Health and Safety. The Company shall maintain conformity with its internal EHS management requirements and align its operational controls with internationally recognized standards, including ISO 45001:2018 for Occupational Health and Safety Management Systems and, where adopted, ISO 14001 for Environmental Management Systems. The Company shall ensure that all refinery activities, including hazardous material handling, waste management, workplace safety, fire protection, and emergency preparedness, are conducted in accordance with applicable laws, permits, approvals, and regulatory obligations.

b. Hazard Identification and Risk Control

Promise Gold Refinery FZE shall proactively identify, assess, and control hazards associated with refinery operations. This includes risks arising from chemical exposure, including acids, fluxes, and other process chemicals; high-temperature processes such as furnaces, smelting, and melting operations; manual handling and lifting activities; machinery and equipment use; and exposure to dust, fumes, heat, and other workplace contaminants. The Company shall implement appropriate engineering controls, administrative controls, safe systems of work, and personal protective equipment (PPE) to eliminate hazards where possible and reduce occupational risks to as low as reasonably practicable.

c. Worker Participation and Consultation

Promise Gold Refinery FZE is committed to promoting a transparent and participative safety culture throughout the organization. The Company shall encourage the active involvement of employees and contractors in EHS matters through toolbox talks, safety briefings, training sessions, inspections, EHS meetings, and incident reporting channels. Employees shall be encouraged to report hazards, near-misses, unsafe acts, unsafe conditions, and environmental concerns without fear of retaliation. The Company shall also support the right of personnel to stop or report unsafe work where there is a genuine concern regarding health, safety, or environmental risk.

d. Training and Competence

Promise Gold Refinery FZE shall ensure that all employees, contractors, and relevant personnel receive appropriate job-specific, task-specific, and EHS-related training necessary to perform their duties safely and responsibly. Training shall include, as applicable, fire safety, emergency response, chemical handling, hazardous materials awareness, safe refinery operations, use and maintenance of PPE, waste handling, and incident reporting procedures. The Company shall conduct periodic refresher training, emergency drills, and awareness programs to ensure ongoing competence and preparedness across refinery operations.

e. Incident Prevention, Reporting, and Corrective Action

Promise Gold Refinery FZE shall maintain a strong incident prevention culture aimed at preventing injuries, occupational illnesses, fires, spills, releases, and environmental incidents. The Company shall encourage proactive reporting of near-misses, unsafe conditions, environmental concerns, and operational incidents and shall investigate such matters in a timely and structured manner. Appropriate corrective and preventive actions (CAPA) shall be implemented to address root causes and prevent recurrence. The Company shall maintain accurate and complete records of incidents, investigations, corrective actions, training, and inspections in accordance with internal procedures and applicable regulatory and management system requirements.

f. Monitoring and Continuous Improvement

Promise Gold Refinery FZE shall implement ongoing monitoring and review mechanisms to evaluate the effectiveness of its Environmental, Health and Safety framework. This shall include the conduct of risk assessments, workplace inspections, safety audits, environmental monitoring, compliance reviews, incident trend analysis, and periodic management reviews. The Company shall use relevant performance indicators, including training completion, inspection findings, corrective action closure, and incident or near-miss trends, to measure performance and identify opportunities for improvement. This policy and the associated EHS framework shall be reviewed periodically, and at a minimum annually, or whenever significant operational, regulatory, or organizational changes occur.

Environmental Protection Commitments

Promise Gold Refinery FZE is committed to minimizing the environmental impact of its gold refining and precious metals processing activities through responsible operational practices, effective controls, and continuous environmental monitoring. The Company recognizes that refinery operations may involve emissions, waste generation, chemical use, and resource consumption, and therefore undertakes to manage such impacts in a responsible and compliant manner.

a. Pollution Prevention

Promise Gold Refinery FZE shall implement appropriate measures to prevent and minimize air, water, and soil contamination arising from refinery operations. The Company shall establish operational controls and response procedures to reduce the risk of spills, leaks, releases, emissions, and other sources of environmental pollution.

b. Waste Management

The Company shall ensure the safe segregation, collection, storage, handling, transport, treatment, and disposal of hazardous and non-hazardous waste generated through refinery operations, in accordance with applicable UAE and Sharjah regulatory requirements. Waste shall be managed in a controlled manner to prevent harm to personnel, the public, and the environment.

c. Resource Efficiency

Promise Gold Refinery FZE shall promote the efficient use of energy, water, raw materials, and consumables across refinery operations. The Company shall seek to reduce unnecessary consumption and wastage where operationally feasible and consistent with safe refining practices.

d. Emission Control

The Company shall implement monitoring and operational control measures to manage and reduce emissions generated from refining and related industrial processes. Where applicable, Promise Gold Refinery FZE shall maintain appropriate systems and controls to ensure that emissions remain within permitted or acceptable regulatory limits.

e. Environmental Monitoring

Promise Gold Refinery FZE shall conduct periodic environmental monitoring, inspections, and assessments to verify compliance with applicable environmental requirements and to evaluate the effectiveness of environmental protection measures. Any identified non-conformities or environmental risks shall be addressed through timely corrective action and management review.

5. OCCUPATIONAL HEALTH AND SAFETY

Promise Gold Refinery FZE is committed to providing and maintaining a safe and healthy working environment for all employees, contractors, visitors, and other personnel who may be present within the refinery premises or engaged in activities associated with the Company's operations. The Company recognizes that gold refining and precious metals processing involve specialized industrial processes, the use of hazardous chemicals, high-temperature equipment, and mechanical operations that may present occupational health and safety risks if not properly managed.

Accordingly, Promise Gold Refinery FZE implements a structured Occupational Health and Safety management approach, aligned with the principles of ISO 45001:2018, to ensure that workplace hazards are effectively identified, assessed, and controlled. The Company is committed to systematically identifying potential hazards associated with refinery operations and implementing appropriate preventive and protective measures to mitigate occupational risks. Promise Gold Refinery FZE ensures that risk assessments are conducted prior to the commencement of operational activities, maintenance tasks, engineering work, or any non-routine operations that may introduce additional safety risks. These assessments are designed to identify potential hazards and establish appropriate control measures to safeguard personnel and maintain safe operational conditions.

The Company also ensures that appropriate Personal Protective Equipment (PPE) is provided, maintained, and used by employees and contractors where required. Personnel are trained on the correct selection, use, and maintenance of PPE in order to reduce exposure to workplace hazards and ensure safe working practices. In addition, Promise Gold Refinery FZE is committed to providing and maintaining safe equipment, machinery, and operational infrastructure within refinery facilities.

Equipment used in refining, smelting, chemical handling, and related processes is maintained in accordance with established maintenance procedures and safety standards to ensure safe and reliable operation.

Promise Gold Refinery FZE seeks to maintain safe working conditions across all refinery facilities, reduce occupational risks, prevent workplace injuries and illnesses, and promote a strong culture of safety and responsibility throughout the organization.

6. HAZARDOUS MATERIALS MANAGEMENT

Promise Gold Refinery FZE recognizes that gold refining and precious metals processing operations involve the use of various chemicals and hazardous substances that require careful handling, storage, and management to ensure the safety of personnel and the protection of the environment. As part of its Environmental, Health and Safety (EHS) framework, the Company is committed to implementing robust hazardous materials management procedures in accordance with applicable UAE environmental regulations, industrial safety requirements, and internationally recognized safety standards.

The Company ensures that all chemicals and hazardous substances used in refining processes are properly stored in designated and controlled storage areas that are designed to minimize risks associated with spills, leaks, fire hazards, or environmental contamination. Storage facilities are maintained in accordance with applicable safety requirements and are subject to regular inspection and monitoring.

Promise Gold Refinery FZE also ensures that all hazardous materials are clearly identified and appropriately labelled in accordance with recognized chemical safety standards. Safety Data Sheets (SDS) for all chemicals and hazardous substances are maintained and made readily accessible to personnel to provide information on safe handling, storage, emergency response procedures, and potential health hazards associated with the substances.

To ensure safe operational practices, the Company has established procedures governing the safe handling, transfer, and use of chemicals involved in gold refining processes. These procedures are designed to reduce exposure risks and ensure that chemicals are handled in a manner that protects both personnel and the environment.

In addition, Promise Gold Refinery FZE provides appropriate training to employees and contractors who may be involved in the handling, storage, or use of hazardous materials. Training programs are designed to ensure that personnel understand the hazards associated with these substances and are competent in applying safe handling practices and emergency response measures.

The Company also maintains clearly defined emergency procedures for chemical spills, accidental releases, or exposure incidents, including appropriate containment measures, reporting protocols, and response actions to mitigate potential health, safety, or environmental risks. Through these measures, Promise Gold Refinery FZE seeks to ensure that hazardous materials are managed safely and responsibly throughout all refinery operations.

7. EMERGENCY PREPAREDNESS AND RESPONSE

Promise Gold Refinery FZE recognizes that refinery operations involve industrial processes that may present potential risks such as fire, chemical incidents, operational accidents, or environmental emergencies. In order to effectively manage such risks and protect personnel, facilities, and the surrounding environment, the Company has established a structured Emergency Preparedness and Response framework as part of its Environmental, Health and Safety (EHS) management system. The refinery maintains comprehensive procedures and operational controls designed to respond promptly and effectively to potential emergency situations that may arise during refinery operations. These may include incidents such as fire or explosions, chemical spills or leaks, workplace accidents or injuries, environmental contamination events, and natural disasters that may impact refinery operations.

Clearly defined evacuation procedures and emergency assembly points are established within the refinery to ensure the safe and orderly evacuation of personnel during emergency situations. Employees, contractors, and visitors are informed of these procedures and are required to follow the safety instructions provided during emergencies. To ensure preparedness, Promise Gold Refinery FZE conducts periodic emergency drills and training exercises to test the effectiveness of emergency response procedures and to ensure that personnel are familiar with their roles and responsibilities during emergency situations.

Promise Gold Refinery FZE has established clear evacuation procedures and designated emergency assembly points within the refinery premises. These measures are designed to facilitate the safe and orderly evacuation of all personnel including employees, contractors, and visitors should an emergency situation arise. The procedures set forth specific actions to be taken during emergencies, ensuring that everyone on site can evacuate efficiently and reach assembly points without confusion or delay.

To promote awareness and compliance, all individuals present at the refinery are thoroughly informed of the evacuation procedures and the locations of emergency assembly points. They are expected to adhere strictly to safety instructions and protocols provided during emergency events, thereby supporting the overall safety of the facility.

In addition to its internal emergency preparedness measures, Promise Gold Refinery FZE establishes and maintains effective coordination and communication channels with relevant local emergency authorities, including Civil Défense and other emergency response agencies. This approach ensures that, in the event of an emergency, the Company is able to request and receive appropriate external support in a timely manner. By engaging proactively with local authorities, Promise Gold Refinery FZE enhances its ability to respond to incidents, thereby supporting the safety of personnel and the protection of refinery assets and the environment.

Promise Gold Refinery FZE is committed to maintaining a robust state of emergency preparedness throughout its operations. The Company implements comprehensive procedures and controls to ensure that any potential emergencies are handled efficiently and effectively. In doing so, Promise Gold Refinery FZE prioritizes the safety and wellbeing of its personnel, safeguards refinery assets from potential harm, and strives to reduce the environmental impact associated with emergency incidents. By upholding these standards, the Company ensures that its response to emergencies is organized, timely, and capable of minimizing risks to people, property, and the surrounding environment.

8. INCIDENT REPORTING AND INVESTIGATION

Promise Gold Refinery FZE is committed to maintaining a proactive safety culture in which all safety incidents, environmental incidents, and near-miss events are promptly reported, documented, and investigated. The Company recognizes that timely reporting and effective investigation of incidents are essential for identifying underlying risks, improving operational safety, and preventing future occurrences. All employees, contractors, and personnel working within the refinery premises are required to report any incident, unsafe condition, environmental concern, or near-miss event immediately through the established reporting channels. This includes incidents that result in injury, property damage, environmental impact, operational disruption, or situations that could potentially have led to such consequences.

Promise Gold Refinery FZE maintains a formal Incident Reporting Register as part of its Environmental, Health and Safety (EHS) management system. This register records all reported incidents, near-miss events, safety observations, and environmental occurrences, along with details of the investigation, corrective actions, and closure status. Upon notification of an incident, the Company conducts a structured investigation process to identify the circumstances and contributing factors associated with the event. Investigations are conducted with the objective of determining the root causes

of the incident, evaluating the effectiveness of existing safety controls, and identifying any gaps in procedures, training, or operational practices.

Based on the findings of the investigation, appropriate corrective and preventive actions are implemented to address identified risks and strengthen operational controls. These actions may include improvements to safety procedures, additional training for personnel, engineering controls, equipment maintenance, or revisions to operational processes.

The outcomes of incident investigations are reviewed by relevant management and safety personnel to ensure that lessons learned are effectively incorporated into the Company's safety management practices. Through this systematic approach to incident reporting and investigation, Promise Gold Refinery FZE aims to prevent the recurrence of similar incidents, enhance workplace safety, and support continuous improvement in Environmental, Health and Safety performance across refinery operations.

9. TRAINING AND AWARENESS

Promise Gold Refinery FZE recognizes that the effective implementation of its Environmental, Health and Safety (EHS) framework relies on ensuring that all personnel working within or on behalf of the refinery are adequately trained, competent, and aware of their responsibilities in maintaining safe and environmentally responsible operations. As a gold refinery operating within a specialized industrial environment involving metallurgical processes, chemical handling, and high-temperature equipment, the Company places strong emphasis on continuous training and awareness to ensure that personnel are capable of identifying hazards, responding appropriately to risks, and performing their duties in accordance with established safety and environmental standards.

To support this objective, Promise Gold Refinery FZE has established a structured EHS training and competency program designed to ensure that employees, contractors, and relevant personnel possess the necessary knowledge and skills to carry out their work safely and responsibly. All personnel working within refinery premises are required to undergo appropriate induction and job-specific training before commencing work in operational areas. The training framework implemented by the Company includes instruction on workplace safety procedures, ensuring that personnel understand the operational hazards associated with refinery activities and the safety measures required to prevent accidents or injuries. Employees are trained on safe operating procedures, hazard identification, reporting of unsafe conditions, and compliance with established safety protocols governing refinery operations.

Promise Gold Refinery FZE provides training related to emergency preparedness and response, ensuring that employees and contractors are familiar with emergency evacuation procedures, fire safety protocols, alarm systems, and the actions required in the event of fire, chemical spills, accidents, or other emergency situations that may occur within the refinery. Given the use of hazardous chemicals in refining processes, the Company also provides specialized training on chemical handling and hazard awareness, including instruction on the safe storage, handling, and transfer of chemicals, recognition of chemical hazards, and the proper interpretation and use of Safety Data Sheets (SDS). This training ensures that personnel understand the risks associated with hazardous substances and the precautions required to protect both personnel and the environment.

The Company further ensures that employees and contractors are trained in the proper use, maintenance, and limitations of Personal Protective Equipment (PPE) required within refinery facilities. Personnel are instructed on the selection of appropriate PPE for specific tasks, as well as on procedures for inspection, maintenance, and replacement to ensure continued protection.

In support of its environmental protection commitments, Promise Gold Refinery FZE also conducts awareness programs relating to environmental protection practices, including responsible waste handling, pollution prevention measures, and compliance with environmental regulations governing refinery operations. To ensure the effectiveness of the training program, the Company conducts periodic

refresher training sessions, safety briefings, toolbox talks, and emergency drills, enabling personnel to maintain their competence and remain aware of evolving safety requirements and operational risks.

All training programs conducted under the Company's Environmental, Health and Safety framework are formally documented. Training records, attendance registers, competency assessments, and certification documentation are maintained by the Compliance and Safety Departments as part of the refinery's EHS management system. These records are retained for monitoring, internal review, and regulatory inspection purposes to demonstrate the Company's commitment to maintaining a competent and safety-conscious workforce. Promise Gold Refinery FZE ensures that all personnel working within its facilities are adequately informed, properly trained, and actively engaged in supporting safe refinery operations and responsible environmental management.

10. ROLES AND RESPONSIBILITIES

Promise Gold Refinery FZE recognizes that the effective implementation of its Environmental, Health and Safety (EHS) framework requires clear accountability and active participation from all levels of the organization. The Company has therefore established defined roles and responsibilities to ensure that environmental protection, occupational health, and workplace safety are integrated into all operational activities and management practices.

a. Senior Management

Senior Management of Promise Gold Refinery FZE holds overall responsibility for ensuring the effective implementation of the Company's Environmental, Health and Safety framework. Management is responsible for establishing the strategic direction of the EHS program and ensuring that adequate resources, systems, and operational controls are in place to support safe refinery operations. In particular, Senior Management is responsible for ensuring that appropriate financial, technical, and human resources are allocated to support the implementation of EHS programs and initiatives. Management also ensures that refinery operations are conducted in full compliance with applicable UAE environmental, occupational health, and industrial safety regulations, as well as with internal EHS policies and procedures. Senior Management is further responsible for reviewing EHS performance, supporting continuous improvement initiatives, and promoting a strong culture of safety and environmental responsibility throughout the organization.

b. EHS Officer / Compliance Officer

The Environmental, Health and Safety (EHS) Officer, in coordination with the Compliance Officer where applicable, is responsible for the day-to-day oversight and implementation of the Company's EHS framework. This role includes monitoring compliance with internal safety procedures and applicable regulatory requirements governing refinery operations. The EHS Officer is responsible for conducting regular safety inspections and workplace assessments to identify potential hazards and ensure that appropriate safety controls are maintained. The officer also ensures that EHS documentation, incident records, training records, and inspection reports are properly maintained as part of the Company's EHS management system. In addition, the EHS Officer is responsible for facilitating incident reporting and investigation processes, recommending corrective and preventive actions, and monitoring the implementation of such measures to address identified safety or environmental risks.

c. Employees and Contractors

All employees, contractors, and personnel working within the premises of Promise Gold Refinery FZE share responsibility for maintaining a safe and environmentally responsible workplace. Personnel are required to comply with all Environmental, Health and Safety policies, procedures, and operational controls established by the Company. Employees and contractors must follow established safety procedures, use appropriate Personal Protective Equipment (PPE) where required, and perform their duties in accordance with safe working practices. They are also responsible for promptly reporting hazards, unsafe conditions, environmental concerns, incidents, or near-miss events to the appropriate supervisory or safety personnel. Furthermore, employees and contractors are expected to actively

participate in safety training programs, emergency drills, and other EHS awareness initiatives conducted by the Company. Through their cooperation and commitment to safe working practices, personnel contribute to the Company's overall objective of maintaining a safe, compliant, and environmentally responsible refinery operation.

11. MONITORING AND COMPLIANCE

Promise Gold Refinery FZE implements a structured monitoring and compliance framework to ensure the effective implementation of its Environmental, Health and Safety (EHS) management system and to verify that refinery operations are conducted in accordance with applicable regulatory requirements, internal policies, and internationally recognized safety standards. The Company recognizes that continuous monitoring and periodic review of EHS performance are essential for identifying potential risks, ensuring compliance, and promoting continuous improvement in refinery operations.

As part of this framework, Promise Gold Refinery FZE conducts regular workplace safety inspections within refinery facilities to identify potential hazards, unsafe conditions, or operational risks that may affect employees, contractors, visitors, or the environment. These inspections are carried out by designated safety personnel and relevant operational supervisors to ensure that appropriate safety controls and procedures are being followed. The Company also implements environmental monitoring programs to evaluate the environmental impact of refinery operations and ensure compliance with applicable environmental regulations. Such monitoring may include assessments of emissions, waste handling practices, chemical storage conditions, and other environmental aspects associated with the refining process.

Promise Gold Refinery FZE conducts internal safety audits and compliance reviews to assess the effectiveness of the Company's EHS management system and verify adherence to established operational procedures, safety standards, and regulatory requirements. These reviews help identify areas where improvements may be required to strengthen safety performance and environmental protection measures. The Company also maintains systems for incident monitoring and trend analysis, whereby safety incidents, near-miss events, environmental occurrences, and safety observations are periodically reviewed to identify recurring patterns or emerging risks. This analysis enables the Company to implement targeted corrective actions and preventive measures to address identified issues.

Findings from inspections, monitoring activities, audits, and incident analyses are documented and reported to Senior Management as part of the Company's EHS oversight process. These findings are used to support informed decision-making, enhance risk management practices, and implement improvements aimed at strengthening operational safety, regulatory compliance, and environmental protection across all refinery activities.

12. CONTINUOUS IMPROVEMENT

Promise Gold Refinery FZE is committed to continuously improving its Environmental, Health and Safety (EHS) performance to ensure safe refinery operations and responsible environmental management. The Company regularly reviews its EHS policies, procedures, and operational practices to ensure they remain effective, relevant, and aligned with applicable UAE regulatory requirements and internationally recognized safety standards. To support continuous improvement, Promise Gold Refinery FZE periodically reviews and updates its EHS policy and operational procedures, adopts improved safety technologies and operational practices where appropriate, and encourages employees and contractors to provide feedback and participate in safety initiatives.

The Company also evaluates its safety and environmental practices against recognized international standards to identify opportunities for improvement and strengthen its overall EHS management system. Through these measures, Promise Gold Refinery FZE aims to maintain a safe workplace, enhance operational safety, and minimize environmental impacts associated with its gold refining activities.

13. REFINERY HAZARD IDENTIFICATION & RISK ASSESSMENT (HIRA) TABLE

Activity	Hazard	Possible Risk	Control Measures
Gold Smelting	High temperature equipment	Burns, fire risk	Heat-resistant PPE, furnace safety procedures
Chemical Handling	Exposure to acids and chemicals	Chemical burns, inhalation hazards	PPE, proper ventilation, SDS availability
Chemical Storage	Improper chemical storage	Spills or exposure	Designated storage areas and proper labelling
Manual Handling of Materials	Heavy lifting	Muscle strain or injury	Use lifting equipment and safe lifting practices
Dust and Fumes	Metal dust or fumes	Respiratory issues	Ventilation systems and protective masks
Equipment Maintenance	Moving machinery parts	Injury or entanglement	Lockout/Tagout procedures and trained staff
Electrical Systems	Electrical faults	Electric shock or fire	Regular inspection and proper grounding
Waste Handling	Improper disposal	Environmental contamination	Waste segregation and approved disposal methods
Chemical Spills	Accidental chemical release	Exposure or environmental harm	Spill kits and emergency response procedures
Workplace Environment	Wet or cluttered floors	Slips and trips	Good housekeeping and safety signage

14. CHEMICAL HANDLING SAFETY MATRIX

Chemical	Use in Refining	Hazard	Safety Measures
Nitric Acid	Gold refining and purification	Corrosive, causes burns	Wear gloves, goggles, and handle with proper ventilation
Hydrochloric Acid	Used in refining processes	Corrosive, harmful fumes	Use PPE and work in ventilated areas
Aqua Regia	Dissolving gold during refining	Highly corrosive and toxic fumes	Handle only by trained staff with proper ventilation
Flux Chemicals (Borax / Soda Ash)	Used in smelting and melting	Dust irritation	Use masks, gloves, and eye protection
Sodium Metabisulfite	Gold precipitation	Irritating fumes	Handle in ventilated area with PPE
Cleaning Chemicals	Equipment cleaning	Skin irritation	Use gloves and follow safety instructions

15. POLICY REVIEW

This Environmental, Health and Safety (EHS) Policy shall be reviewed periodically to ensure that it remains effective, relevant, and aligned with applicable UAE regulatory requirements, operational practices, and internationally recognized safety standards. At a minimum, the policy shall be reviewed annually or earlier if required due to significant regulatory developments, operational changes within refinery activities, audit findings, or updates to industry best practices. Any amendments or revisions to this policy shall be formally reviewed and approved by the Senior Management of Promise Gold Refinery FZE before implementation.

16. REVISION RECORDS

Version	Date	Section Revised	Description of Revision	Approved By
1.0	Sept 2024	Initial Release	First issuance of the Environmental, Health and Safety (EHS) Policy establishing the refinery's commitment to environmental protection, occupational health, and workplace safety.	Senior Management
2.0	August 2025	Full Policy Review	Policy updated to strengthen environmental protection measures, hazardous material management, and workplace safety controls in alignment with applicable UAE environmental regulations, occupational safety standards, and international EHS best practices.	Senior Management

17. POLICY APPROVAL AND SIGN-OFF

This Environmental, Health and Safety (EHS) Policy has been reviewed and approved by the authorized management of Promise Gold Refinery FZE. The policy reflects the Company's commitment to protecting the environment, ensuring workplace health and safety, and maintaining safe operational practices across all refinery activities.

All employees, contractors, and visitors are required to follow the environmental, health, and safety requirements outlined in this policy while working at or visiting the refinery premises. The Environmental, Health and Safety Officer and Compliance Department are responsible for monitoring the implementation of this policy and ensuring that refinery operations comply with applicable UAE environmental and occupational safety regulations. This policy will be reviewed periodically to ensure continued compliance with regulatory requirements and operational safety standards.

ANNEXURE A

EHS Compliance Monitoring Checklist

Area of Inspection	Check Item	Status (Yes / No)	Remarks
Workplace Safety	Work areas are clean and free from hazards		
	Safety signage is visible and clear		
	Walkways and emergency exits are unobstructed		
Personal Protective Equipment (PPE)	Employees are wearing required PPE		
	PPE is in good condition		
	Adequate PPE is available for workers		
Chemical Safety	Chemicals are properly labelled		
	Safety Data Sheets (SDS) are available		
	Chemicals are stored in designated areas		
Fire Safety	Fire extinguishers are available and accessible		
	Fire exits are clearly marked		
	Fire alarms and emergency equipment are functional		
Waste Management	Waste is segregated properly		
	Hazardous waste is stored safely		
	Waste disposal follows approved procedures		
Equipment Safety	Machinery is maintained and inspected		
	Safety guards are installed on equipment		
	Electrical systems appear safe and secure
